

**BRM**

**Business Risk Management Services**

Services to the Insurance Industry

*We have done a number of inspections so far this year and are well aware of the problems of Insureds who have EPS panels in their building's construction.*

*We are also aware of the problems Insured's are having in obtaining Insurance, a number cannot obtain insurance*

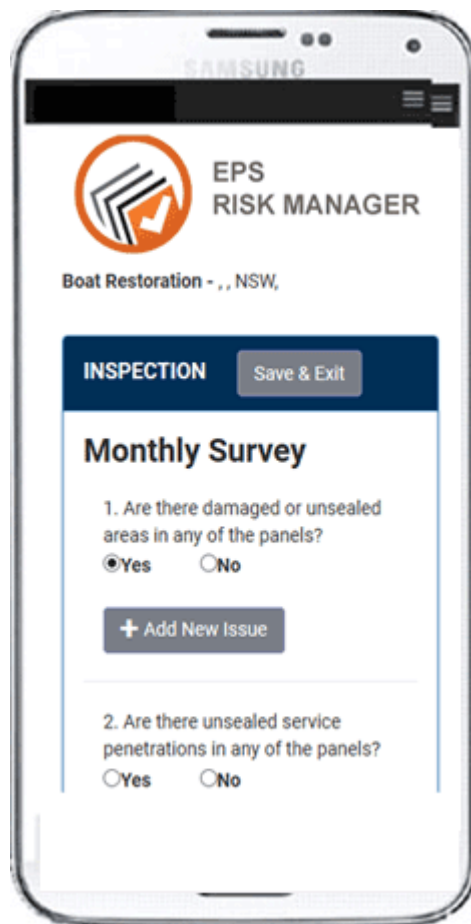

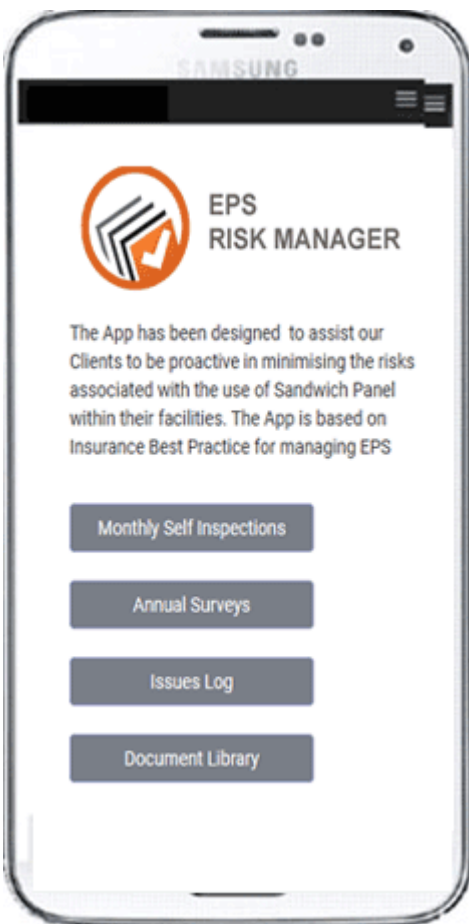

*From the fires that have occurred the Insurance Industry know what risk management controls that should be in place or what is Best Practice in EPS Management. Things like Hot and Cold Permits etc.*

*While large Corporates might know what EPS Best Practice is, from our experience the smaller Insured's do not.*

*From our inspections, virtually none of the Insured's we visited had implemented the EPS Management Best Practice procedures.*

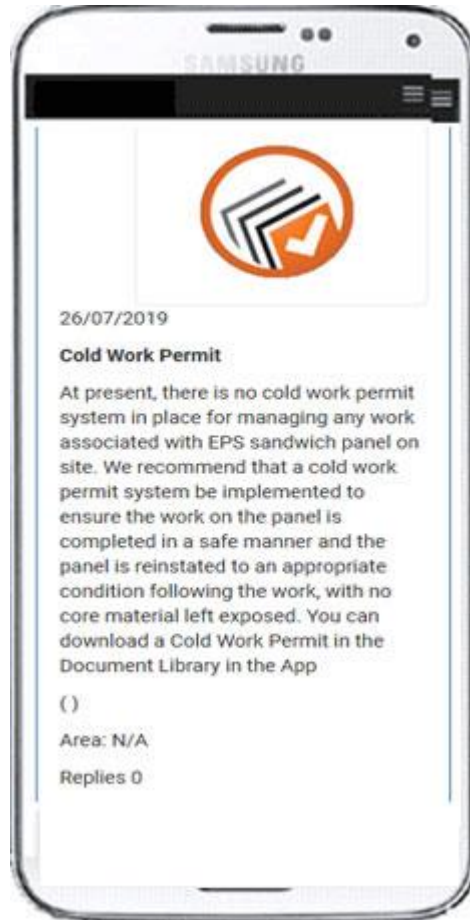

The EPS Risk Manager App that is designed to assist Insured's implement EPS Best Practice,

The App contains, annual and monthly inspections, Issues database to allow action and close off and a library of procedures that can be downloaded

Take and upload photos of issues identified during monthly inspections

During management survey App auto generates recommendations to upgrade to best practice
