

PUBLIC LIABILITY RISK PROFILE
Public Liability underwriting information

PUBLIC LIABILITY RISK PROFILER

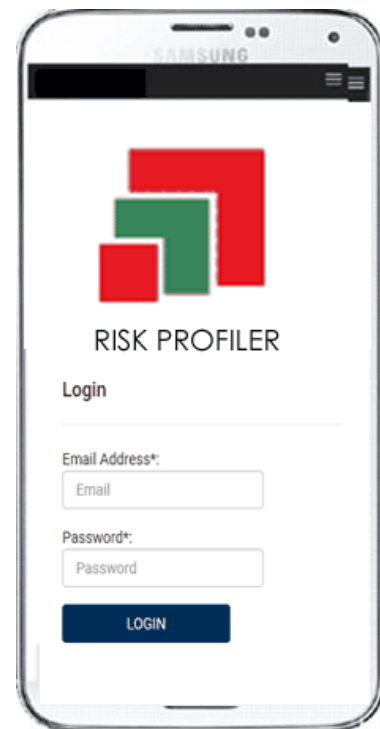

An App to collect public liability underwriting information

Today's Situation

- Insured premiums are increasing for Long tail products including public liability
- Underwriters are looking for additional underwriting information.
- From our surveys we are seeing that there is a lack of knowledge of what is insurance best practice in public liability

Our Solution

- Our Public Liability Risk Profiler App allows Brokers to carry out a brief survey to collect underwriting information.
- Once the survey is complete the app will generate a report that can be forwarded to underwriters
- The Risk Profiler profiles what is insurance best practice in public liability risk mitigation and can be provided to the Insured.

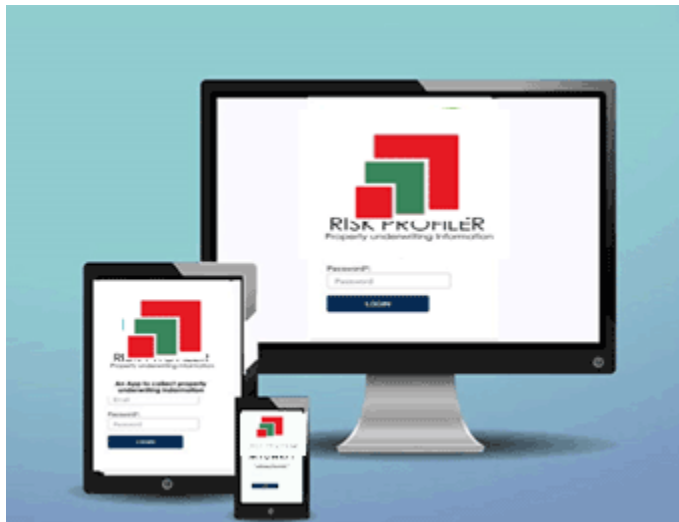

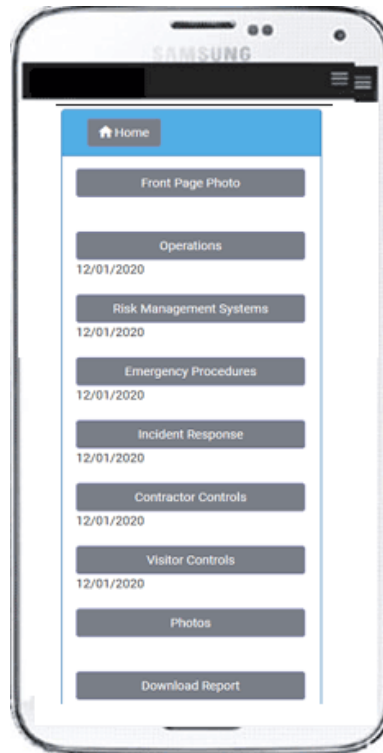

PUBLIC LIABILITY RISK PROFILE

Public Liability underwriting information

Areas covered include:

- Operations
- Risk management systems
- Emergency procedures
- Incident response
- Contractor controls
- Visitor controls
- Upload 6 photos
- Down reports in pdf or word

Risk Profiler is a web based App that can work across all platforms.
