PROPERTY RISK PROFILER

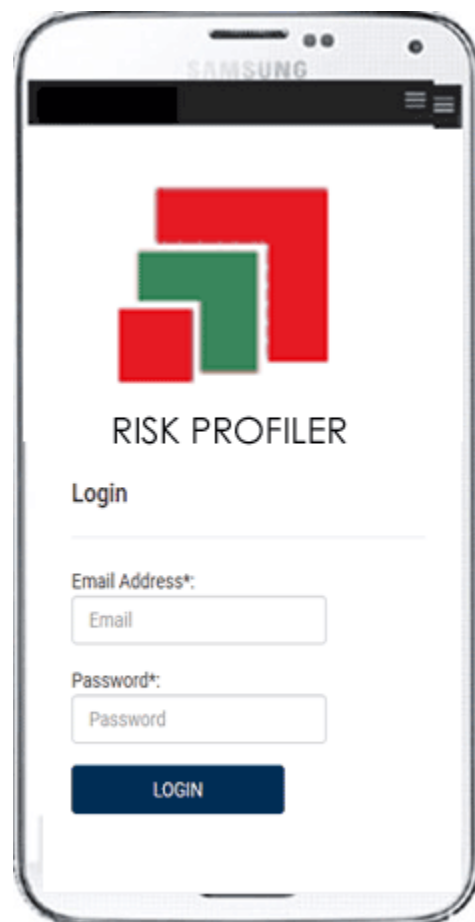

An App to collect property insurance underwriting information

Today's Situation

- Insured premiums are increasing for Long tail products including public liability
- Underwriters are looking for additional underwriting information.
- From our surveys we are seeing that there is a lack of knowledge of what is insurance best practice in public liability

Our Solution

- Our Property Risk Profiler App allows Brokers to carry out a brief survey to collect underwriting information.
- Once the survey is complete the app will generate a report that can be forwarded to underwriters
- The Risk Profiler profiles what is insurance best practice in property insurance risk mitigation and can be provided to the Insured.
- Unlimited number of surveys
- Designed for SME business

PROPERTY RISK PROFILE

Property underwriting information

Special features

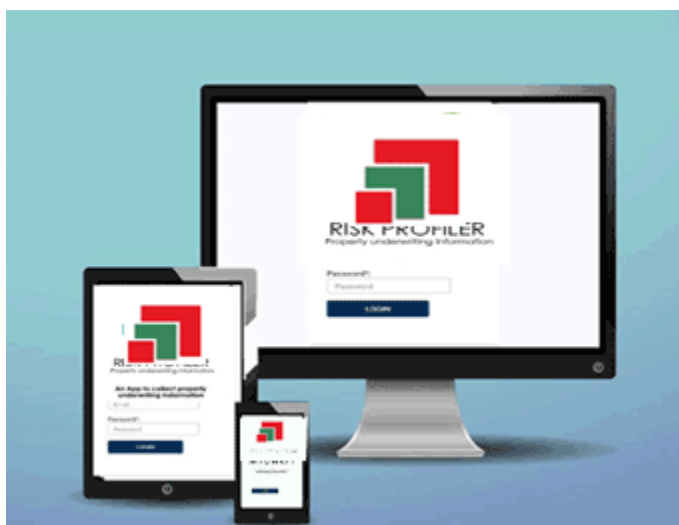

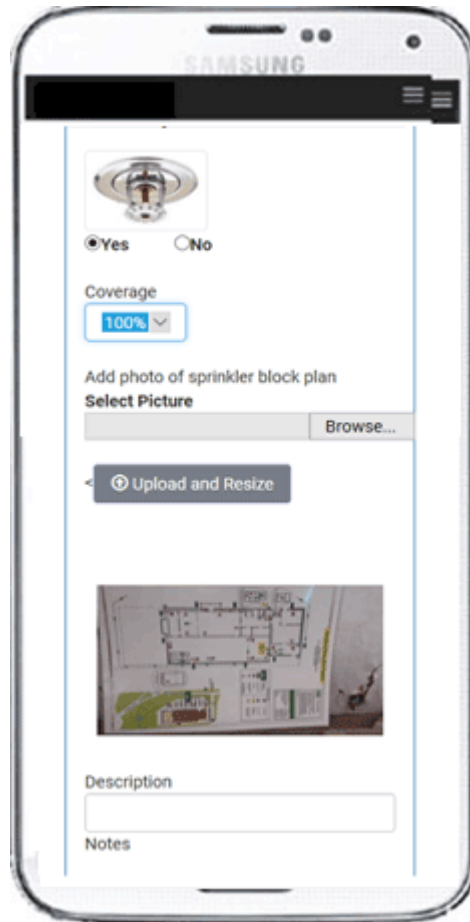

Heavy use of photos including prompting of what photos should be included

- Exposures
- Storage
- Fire Protection
- Electrical
- Etc

Mainly tick boxes very little narrative required

Unlimited number of surveys

Designed for SME business

Risk Profiler is a web based App that can work across all platforms.
